

**COMMONWEALTH OF VIRGINIA
SINGLE AUDIT REPORT**

**FOR THE YEAR ENDED
JUNE 30, 2004**

EXECUTIVE SUMMARY

The results of our single audit of the Commonwealth of Virginia for the year ended June 30, 2004, are summarized below:

- We issued an unqualified opinion on the basic financial statements;
- We found certain matters that we consider reportable conditions, one of which we identified as a material weakness in internal control over financial reporting;
- We did not identify instances of noncompliance with selected provisions of applicable laws and regulations or other matters which could have a material effect on the basic financial statements;
- We did not identify material weaknesses in the internal control over major programs; however, we did find certain matters and instances of noncompliance with selected provisions of laws and regulations related to major programs required to be reported in accordance with OMB Circular A-133, Section .510(a); and
- We issued an unqualified opinion on the Commonwealth's compliance with requirements applicable to each major program.

Our audit findings are reported in the accompanying "Schedule of Findings and Questioned Costs."

The Honorable Mark R. Warner
Governor of Virginia
State Capitol
Richmond, Virginia

The Honorable Lacey E. Putney
Chairman, Joint Legislative Audit
and Review Commission
General Assembly Building
Richmond, Virginia

We are pleased to submit the statewide **Single Audit Report of the Commonwealth of Virginia**, for the fiscal year ended June 30, 2004.

The Single Audit Report for the Commonwealth of Virginia discloses the Commonwealth's compliance with requirements applicable to major federal financial assistance programs. The statewide Single Audit Report provides the General Assembly and agency management with a means to determine how internal controls affect federal funds and whether agencies are complying with federal laws and regulations.

I would like to express my appreciation to the many individuals whose efforts assisted in preparing this report. This report could not have been accomplished without the professionalism and dedication demonstrated by the staff within this Office. We would like to recognize the agency and institution management, and federal program and financial staffs for their cooperation and assistance in resolving single audit issues.

We believe this report represents a significant indication of the sound fiscal operations of federal funds in the Commonwealth. The report should greatly assist agency management in administering federal programs and enhance their dealings with federal agencies.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE
AND OTHER MATTERS BASED ON THE AUDIT OF THE BASIC FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

We have audited the basic financial statements of the Commonwealth of Virginia, as of and for the year ended June 30, 2004, and have issued our report thereon dated December 14, 2004. This report relates only to the Commonwealth and not to certain agencies and component units that were audited by other auditors discussed in Note 1-B of the "Notes to Financial Statements."

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Commonwealth of Virginia's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the Commonwealth's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements. These reportable conditions are described in the accompanying "Schedule of Findings and Questioned Costs" as items 04-01 through 04-12.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the basic financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, of the reportable conditions described above, we consider item 04-06 to be a material weakness.

We also noted other matters involving the internal control over financial reporting that we have reported to the management of the individual state agencies and institutions.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Commonwealth of Virginia's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed one instance of noncompliance that is required to be reported under Government Auditing Standards described in the "Schedule of Findings and Questioned Costs" as item 04-10. While we found no other matters required to be reported, we noted certain immaterial instances of noncompliance that we have reported to the management of the individual state agencies and institutions.

This report is intended solely for the information and use of the Governor and General Assembly of Virginia, management, federal awarding agencies, and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a matter of public record and its distribution is not limited.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH

MAJOR PROGRAM AND INTERNAL CONTROL OVER COMPLIANCE

IN ACCORDANCE WITH OMB CIRCULAR A-133

Compliance

We have audited the compliance of the Commonwealth of Virginia with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement that are applicable to each of its major federal programs for the year ended June 30, 2004. The Commonwealth's major federal programs are identified in the "Summary of Auditor's Results" section of the accompanying "Schedule of Findings and Questioned Costs." Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the Commonwealth's management. Our responsibility is to express an opinion on the Commonwealth's compliance based on our audit. This report relates only to the Commonwealth and not to the agencies and component units discussed in Note 1 of the "Notes to the Schedule of Expenditures of Federal Awards."

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Commonwealth's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the Commonwealth's compliance with those requirements.

In our opinion, the Commonwealth of Virginia complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2004. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements that are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying "Schedule of Findings and Questioned Costs" as items 04-13 through 04-16.

Internal Control Over Compliance

The management of the Commonwealth is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the Commonwealth's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

We noted certain matters involving the internal control over compliance and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over compliance that, in our judgment, could adversely affect the Commonwealth's ability to administer a major federal program in accordance with applicable requirements of laws, regulations, contracts, and grants. These reportable conditions are described in the accompanying "Schedule of Findings and Questioned Costs" as items 04-13 through 04-16.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts, and grants caused by error or fraud that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we believe that none of the reportable conditions described above is a material weakness.

This report is intended solely for the information and use of the Governor and General Assembly of Virginia, management, federal awarding agencies, and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a matter of public record and its distribution is not limited.

COMMONWEALTH OF VIRGINIA
SUMMARY OF AUDITOR'S RESULTS
FOR THE YEAR ENDED JUNE 30, 2004

Financial Statements

Type of auditor's report issued:	<u>Unqualified</u>
Internal control over financial reporting:	
Material weakness identified?	<u>Yes</u>
Reportable conditions identified not considered to be material weaknesses?	<u>Yes</u>
Noncompliance material to financial statements noted?	<u>No</u>

Federal Awards

Internal Control over major programs:	
Material weakness identified?	<u>No</u>
Reportable conditions identified not considered to be material weaknesses?	<u>Yes</u>

Type of auditor's report issued on compliance for major programs:	<u>Unqualified</u>
---	---------------------------

Any audit findings disclosed that are required to be reported in accordance with Circular A-133, Section .510(a)?	<u>Yes</u>
---	-------------------

The Commonwealth's major programs are as follows:

CFDA Number(s)	Name of Federal Program or Cluster
10.557	Special Supplemental Nutrition Program for Women, Infants, and Children
14.228	Community Development Block Grants
16.007	State Domestic Preparedness Equipment Support Program
17.225	Unemployment Insurance
17.245	Trade Adjustment Assistance – Worker's
20.401	Port Security Grants
20.509	Formula Grants for Other Than Urbanized Areas
21.999	Jobs and Growth Tax Relief Reconciliation Act of 2002
83.544	Public Assistance Grants
84.367	Improving Teacher Quality State Grants

CFDA Number(s)	Name of Federal Program or Cluster
93.003	Public Health and Social Services Emergency Fund
93.283	Center for Disease Control and Prevention – Investigations and Technical Assistance
93.558	Temporary Assistance for Needy Families
93.917	HIV Care Formula Grants
97.050	Federal Assistance to Individuals and Households – Other Needs
10.551 10.561	Food Stamp Cluster
17.258 17.259 17.260	Workforce Investment Act (WIA) Cluster
20.205 23.003	Highway Planning and Construction Cluster
84.007 84.032 84.033 84.038 84.063 84.268 93.342 93.364 93.925	Student Financial Assistance Cluster

Commonwealth qualified as low-risk auditee? **No**

FINANCIAL STATEMENT FINDINGS

04-01 Improve Capital Asset Management and Reporting

Applicable to: Department of Transportation

General Information:

Transportation maintains and reports a majority of the Commonwealth's infrastructure, which consists of highways, bridges, tunnels, and right-of-way land, as well as a substantial portion of the Commonwealth's capital assets, including buildings and equipment. For fiscal year 2004, Transportation's infrastructure and other capital assets totaled \$12 billion, net of accumulated depreciation. Transportation reports financial information, including asset values and depreciation, related to all its capital assets for inclusion in the Commonwealth's Annual Financial Report (CAFR).

As a result of the recommendations in the fiscal year 2003 audit, Transportation began improving its capital asset internal controls and financial reporting processes. There has been a proactive attitude and an increase in accountability within Transportation to ensure accurate financial reporting of capital assets for fiscal year 2004.

Transportation has improved its capital asset and financial reporting processes; however, there are several areas that Transportation should continue to improve. Transportation should continue its establishment and definition of roles and responsibilities within the new Capital Asset and Inventory Control Division. This definition will help enhance communication between individuals, divisions, and districts, which still needs improvement specifically relating to the Asset Management Division. In addition, Transportation does not have a reconciliation process for reclassifying assets from one category to another. Transportation did not monitor asset acquisitions to ensure proper capitalization during fiscal year 2004. Although the Asset Management Division performed fuel and equipment inventories, the Capital Asset and Inventory Control Division did not include the Asset Management Division in its asset inventory efforts because Transportation has not yet defined the relationship between the two divisions.

Overall the adjustments made during this audit were minimal in comparison to the prior years. The net effect of all capital asset audit adjustments totaled \$1.7 million. This was a major improvement from the prior year.

Changes from the prior year:

Transportation hired a Financial Reporting Unit Manager within the Controller's Office to be responsible for the capital asset reporting function. In addition, Transportation is creating a Capital Asset and Inventory Control Division, which will exist directly under the Chief Financial Officer and hired district inventory managers to aid in implementing and executing the new policies and procedures. This Division became effective December 2004 with an Acting Division Administrator. Within this Division there will be three distinct areas: inventory, capital assets, and compliance. Due to its recent creation, the Division has established responsibility for some, but not all, statewide policies, methodologies, controls, and reporting of assets, but the Division is in the process of defining these functions.

We recommend the Capital Asset and Inventory Division have central oversight for each asset area, district, and central office with authoritative control. This oversight should include

monitoring, coordinating, and managing the inventory of Transportation's assets during the year as well as compiling financial reporting information at year end. Transportation should continue to define the responsibilities and functions of the Capital Asset and Inventory Division.

Issues:

During the fiscal year 2003 audit, we noted the Asset Management Division did not properly capitalize fuel terminals. In response to this finding in fiscal year 2004, Transportation determined that it had improperly recorded its fuel facilities on the Fixed Asset Accounting and Control System (FAACS) by including the building and the fuel equipment all in one asset. In order to separate the costs between the building and the equipment, the Capital Outlay Division deleted these assets from FAACS and added the fuel canopies as "new assets" to FAACS. Transportation also added the equipment portion of the fuel facilities, including terminals, dispensers, underground storage tanks, and automatic gauging systems to the major equipment database. The assets involved in this process totaled approximately \$24 million.

The process the Capital Outlay and Asset Management Divisions used to record these assets did not provide an adequate audit trail. Although the Asset Management Division instructed the district on how to make these changes, the Districts did not use consistent salvage values for similar assets. The differences, resulting from the inconsistent data, are immaterial for financial reporting purposes. However, Transportation should review these assets, determine the appropriate useful lives, and adjust the database as needed.

As a result of a complete inventory of buildings and improvements, Capital Outlay deleted and added "new assets" for older buildings as well as those that had renovations or improvements. Transportation improperly included these changes as new acquisitions rather than prior period adjustments for financial reporting purposes. This error and the errors from the reclassification of the fuel terminals above resulted in a \$2.6 million audit adjustment.

The Commonwealth Accounting Policies and Procedures (CAPP) manual directs agencies not to delete assets from FAACS because it eliminates the audit trail. Transportation should complete a full reconciliation of all differences within FAACS for fiscal year 2003 and 2004 to determine the most appropriate way to report the assets.

Capital Acquisitions

Transportation did not monitor asset acquisitions to ensure proper capitalization prior to June 2004. We found that Transportation did not capitalize 14 percent of asset purchases tested. This is due to the divisions not knowing into "which asset system" they should record the assets. Transportation also does not have documented policies and procedures for purchasing and capitalizing electronic or data processing equipment to distinguish between Transportation and Virginia Information Technology Agency owned assets. Transportation began monitoring potential asset purchases in June 2004; however, we were unable to determine the effectiveness of this procedure given the short time it was in effect during the fiscal year under audit. The new Capital Asset and Inventory Control Division should continue monitoring asset acquisitions and develop policies for electronic and data processing equipment.

The fiscal year 2003 audit noted that Transportation needed to develop a method to capture and capitalize the cost of improvements other than buildings for existing assets so that they can capitalize this information by 2006 to comply with Governmental Accounting Standards Board Statement No. 34. Transportation began developing a process to capitalize these costs; however, as

of the end of our audit, this methodology was not available for review. Transportation should finalize this methodology so that it is available for audit and review before for fiscal year 2006 financial reporting.

Equipment Management System (EMS)

Transportation records and tracks the different categories of capital assets using several different systems and an Access database. Transportation's use of multiple systems and schedules makes tracking capital assets difficult. One of these multiple systems is the Equipment Management System (EMS) used by the Asset Management Division. Transportation originally developed EMS as an equipment asset maintenance and management system. EMS is an old system and Transportation cannot easily query information out of the system. As reported during the fiscal year 2003 audit, Transportation experienced difficulty implementing financial reporting changes due to the system constraints.

During fiscal year 2004, the Financial Reporting Unit Manager reviewed EMS to improve the quality of the information maintained in the system for financial reporting purposes. As a result, Transportation was able to evaluate and modify EMS so that it could calculate depreciation for the assets and provide the users with a more efficient method of obtaining capital asset information from the system. However, we recommend Transportation should continue to evaluate EMS and consider implementing a new asset management system. Transportation should consider incorporating all of its other capital asset systems into a new system.

Asset Inventory Counts

Transportation completed a comprehensive inventory of all asset categories during fiscal year 2004. During this process, Transportation emphasized the importance of performing and certifying asset inventories. Central Office coordinated and developed an inventory certification process for major equipment, buildings, infrastructure, and data processing equipment. However, the Capital Asset and Inventory Control Division did not include the Asset Management Division in its asset inventory efforts because Transportation has not yet defined the relationship between the two divisions. Not coordinating the scheduling of asset inventory counts among these asset areas can result in inefficiencies in the districts.

We recommend the Capital Asset and Inventory Division coordinate the asset inventory efforts for all asset categories to meet the Commonwealth's accounting policy requirement of having inventory counts every two years.

Other Adjustments

Transportation's internal audit performed a review of infrastructure and found that Transportation had not adjusted for highway and road abandonments and discontinuances when capitalizing infrastructure each year. Abandonments and discontinuances represent roadways removed from state service or turned over to the locality. Since the abandoned and discontinued highways and roads are old roads and fully depreciated, there is no effect on the Commonwealth's financial statements. Transportation has identified all discontinuances associated with the primary roadway system but still needs to adjust the infrastructure amounts for 2006.

Management Plan for Corrective Action:

Our corrective action plan includes the following actions:

- 1. Define roles and responsibilities of the Capital Assets and Inventory Control Division.*
- 2. Develop an action plan to include assets currently controlled by the Asset Management Division under the oversight and direction of the Capital Assets and Inventory Control Division.*
- 3. Review the equipment portion of fuel facilities and their appropriate useful lives and salvage values.*
- 4. Perform reconciliation of differences within FAACS for FY 2003 and 2004.*
- 5. Review and refine as necessary the methodology for monitoring asset acquisitions.*
- 6. Document and refine procedures for capitalizing electronic or data processing equipment to distinguish between VDOT and VITA owned assets.*

Responsible Position: Director of Capital Assets and Inventory Control Division

Estimated Completion Date: June 1, 2005

- 7. Finalize the methodology for capturing and capitalizing the cost of improvements other than buildings for existing assets.*
- 8. Evaluate current systems for reporting assets, including EMS, and consider incorporating all capital assets into a new system.*

Responsible Position: Director of Capital Assets and Inventory Control Division

Estimated Completion Date: June 15, 2005

- 9. Adjust infrastructure amounts, starting with FY2005, for primary roadway discontinuances and abandonments.*

Responsible Position: Controller

Estimated Completion Date: July 31, 2005

Financial Reporting

04-02 Strengthen Internal Controls in the Budgeting and Accounting Support Functions

Applicable to: Department of Rail and Public Transportation

In order to meet the increasing demands for service, react to budget reductions, and minimize administrative costs, management must consider the nature and design of support services. The Department of Rail and Public Transportation (DRPT) is a relatively small agency with 44 authorized positions; however, these individuals had responsibility over appropriations of \$154 million in fiscal year 2004, and their budgeted appropriations will increase by fiscal year 2006 to \$260 million, a 68 percent increase.

Our review of DRPT's processes identified internal control weaknesses in the budgeting and accounting support functions. Over the past year, DRPT lost several key support personnel, including the Controller. Management is in the process of filling these positions and determining the level of staffing needed to support agency operations.

We recommend DRPT management consider partnering with another larger or several smaller agencies to obtain support services. Maintaining internal controls and knowledgeable and experienced staff, and ensuring the continuation of operation is difficult when staffing levels are low. Additionally, having in-house staff is not always cost ineffective, but represents a burden on management to continuously train and oversee these functions. This diverts resources from the agency's primary service delivery functions, grants management, and budgeting.

Over the past several years, a number of agencies similar in size to DRPT, including the Governor's Office, have moved to sharing administrative support functions. These functions include accounting, payroll, purchasing, and some personnel functions, which allows the agency to concentrate on its primary mission.

In our opinion, DRPT management should pursue the option of sharing support functions with another agency or agencies rather than incurring the cost of hiring, training, and internally managing all of these functions. Not following this option, we believe, will require management to conduct an extensive review of its internal control systems and overall support activities. We do not believe that solely replacing the Controller will provide the appropriate level of expertise and knowledge to assist an agency of this complexity. Rather, sharing support resources will give management greater flexibility and allow the agency to focus on grants management and budgeting.

Management Plan for Corrective Action:

The Department of Rail and Public Transportation (DRPT) values the efforts of the APA and welcomes its comments concerning the operations of the agency. We share the same goals with respect to the agency's finances, and look forward to working with you into the future.

Your review finding matches to the preliminary findings of our internal review of the processes in the accounting and budgeting areas. Since our review uncovered some controls that needed to be strengthened, we have begun an in-depth evaluation of the control environment in the accounting and budgeting areas. As this process must be performed in conjunction with the day-to-day financial operations and due to the uncertainty of the nature and extent of the possible findings, the estimated completion dates extend through the first quarter of fiscal year 2006.

Our corrective action plan includes the following actions:

- 1. Perform an in-depth evaluation of the internal control structure in the accounting and budgeting section within DRPT. Document any deficiencies.*
- 2. Implement corrective action for identified internal control deficiencies.*

Responsible Position: Chief Financial Officer

Estimated Completion Date: May 15, 2005

- 3. Document the controls through updated policies and procedures.*

Responsible Position: Chief Financial Officer

Estimated Completion Date: September 30, 2005

- 4. Ensure that the staff understand the agency's objectives and how the internal controls assist management in meeting those objectives.*

Responsible Position: Chief Financial Officer

Estimated Completion Date: ongoing

04-03 Improve Voucher Documentation and Follow Department Policies and Procedures

Applicable to: Department of Social Services

The Department's Division of Finance had inadequate supporting documentation or did not follow established policies for 6 out of 25 selected payment vouchers and five out of ten selected contracts. We found the following:

- A missing requisition from a payment voucher;
- A payment voucher had a missing receiving report and two others had incomplete receiving reports. In addition, the same individual both ordered and received the goods for a purchase;
- Two payment vouchers had missing or inadequate supporting information;
- The Department ordered goods from a vendor before preparing a purchase order; and
- Two miscoded entries in FAAS.

Furthermore, the Department could not provide a copy of the contract administration letter for five out of ten selected contracts. Without proper identification of the contract administrator and

applicable responsibilities, the Department may not be adequately monitoring contracts and could make payment for services outside the scope of the contract.

The Department should maintain adequate supporting documentation to accompany vouchers and adhere to all applicable regulations. The Department should use the receiving function on the FAAS system to avoid missing receiving reports. The Department should also adhere to all contract and procurement guidelines including designating a contract administrator and maintaining a copy designation letter.

Management Plan for Corrective Action:

Despite all efforts to the contrary, documentation (i.e., human) errors do occur in an environment where approximately 24,000 vouchers are processed annually. We do not, however, concur with the voucher error statistics cited by the auditor. For example, the allegedly missing requisition was not missing; it was in paper form; two receiving reports cited as incomplete contained all proper information for processing; and one unsupported voucher was attributable to vendor problems with the state procurement system (i.e., the one percent eVA fee). Valid errors were corrected during the audit to the extent possible. We believe our internal controls for processing payment vouchers are solid and adequate.

Regarding the unlocated contract administrator letters, we believe these letters were completed as required but were not retained. Effective July 2004, a copy of the letter sent to the assigned contract manager is maintained in the applicable contract file and in a centralized electronic file, both in the Office of General Services.

Responsible Position: David Mitchell, Chief Financial Officer

Estimated Completion Date: Completed July 2004.

DATA PROCESSING CONTROLS

Access Controls

04-04 Remove Unnecessary RIMS User Access Timely

Applicable to: Virginia Retirement System

We found fourteen users who have inappropriate access to the Retirement Information Management System (RIMS). Two of these users should have no access to RIMS while the other twelve users have inappropriate access to critical functions such as changing social security numbers and bank routing numbers.

Inappropriate access has resulted from supervisors granting temporary elevated access to employees to help meet staff shortfalls and then not downgrading access when the problem is resolved. Additionally this occurs when an employee changes duties or function within an area, but they are allowed to keep their old access levels. As a result, users have access to functions that are not essential or may be incompatible to their job responsibilities, compromising internal controls.

We recommend that the Virginia Retirement System change their policy to require supervisors to tell the RIMS Security Manager if the change in access is temporary or permanent. The Security Manager should track all temporary change requests, and supervisors should tell the Security Manager of changes. The Security Manager should periodically review job duties or other assignment to determine if access is appropriate.

Management Plan for Corrective Action:

We have reviewed each of the situations cited above. We noted that 6 of the instances noted had been corrected during the VRS semi-annual security review but which should have been corrected earlier, 1 instance where access appeared to be inappropriate but which was for inquiry only, 2 instances where the access appeared to be unnecessary but which were in place to provide a back-up for the primary user, and 5 instances where the security was inappropriate but which were corrected by VRS after being identified during the auditor's review.

The above recommendation is addressed in existing policies and procedures for the agency as set forth in the VRS Information Technology Security Policy, Section 2.5 – Changes in Job Functions and Sections 2.5.1 – Job Function Change Procedures. In this policy, both staff and their applicable VRS management are responsible for timely changes in access due to job function changes. In addition, as part of the agency's active security awareness program, all staff and management are sent an e-mail reminder each month that access changes must occur timely as job functions change. Given this, VRS management will address this recommendation individually with the staff and management involved.

Responsible Position: Timothy Bass, Chief Technology Officer

Estimated Completion Date: November 12, 2004

04-05 Create Policy regarding Separated Employee Access to Critical Systems

Applicable to: Department of Health

The Department of Health (VDH) has failed to remove separated employee access from its critical systems. This is in direct violation of VDH's Computer Access Security policy that states, "Each Departmental Unit is responsible for notifying the appropriate SSO when an employee who has computer access (logon) is terminating." Through testwork, it was determined that 20 separated employees still have access to one or more of VDH's critical systems. Below is a description of the separated employee access findings:

- 15 separated employees with WICNet access
- 3 out of the 15 above also have WebVision access
- 3 additional separated employee with WebVision access
- 1 additional separated employee with F&A access
- 1 additional separated employee with CARS access

Per policy, the departmental directors/supervisors have failed to notify the SSOs when an employee has separated from the agency or the employees' access was not removed in a timely manner. The failure to remove a user's access could compromise the system's or data's integrity.

We recommend that VDH update its Computer Access Security policy to detail the process of removing separated employee access. The policy should include detailed procedures for the Districts' Supervisors/Managers, Human Resources personnel, and the agency SSO(s) to follow. The policy should list responsibilities and procedures for each party to follow to ensure that access is terminated immediately. In addition, VDH should implement a monitoring and verification strategy that confirms the policy's compliance.

Management Plan for Correction Action:

We do not concur that the failure to remove access as noted by the APA compromises the systems or the data integrity:

We acknowledge that because of the number and disparate types of systems that VDH system users have access to and the number of business units that control access to applications, ensuring that separating employees are removed from all systems promptly proves to be an extremely challenging task.

Therefore VDH has put in place policies (ITRM- Computer Access Security section) and mechanisms (HR-14 Separating Employee Action Form) that require supervisory personnel to notify the appropriate areas including IT when employees leave the agency. In spite of these policies, procedures and mechanisms, exceptions can be found where this information is not always promptly communicated to the correct areas or personnel. For example, 18 of the 20 instances that the APA notes in its report represent instances where Health District supervisor personnel failed to remember applications where user access and removal is granted locally, and failed to notify their own local site security officers.

As we continue to improve our security stance in this area, VDH believes that we have nullified the above mentioned vulnerability by adhering to the National Institute of Standards and Technology (NIST), International Information Systems Security Certification Consortium (ISC) 2 and others recommended "Best Practices" strategy of "Defense in Depth."

VDH has for years employed this strategy which practices a "layered defense" in its security stance. In practical application as it applies to separating employees, this means that as soon as central office IS security is informed of a separating employee their remote access to the VDH network whether via PPP dialup or VPN is removed. (Layer 1). At this point a former employee has no more access to the VDH network than anyone visiting a VDH office who might want to do harm to the network.

Per VDH security policy (ITRM – Computer Access Security and Data Security sections) VDH PCs that have network access are not readily accessible to the public. (Layer 2)

In addition they are required to be protected from unauthorized access by being logged off when not in use or password screensaver protected when they are on the network and not occupied. (Layer 3.) To date VDH has not suffered any instances where these layers of defense have been breached.

Additional measures we plan to take to improve our separating employee notification process include:

- 1. A reminder from the Commissioner's Office to all District Directors and Office managers emphasizing the importance of promptly notifying their local Site Security Officers when employees separate.*

2. *An update to Separating Employee Action form to include the same reminder to the supervising employee, a requirement for the listing of applications for which the separating employee has access and a listing of the appropriate areas or personnel to which the form is to be sent depending on the listed applications.*

Responsible Position: Jim Burns, M.D., Chief Information Officer

Estimated Completion Date: March 1, 2005

04-06 Properly Manage and Maintain Access to Information Systems

Applicable to: Department of Social Services

The Department provides central statewide oversight for policies and procedures to the 120 locally-operated social service agencies. In support of the locally-operated social service agencies, the Department has a number of central systems for determining and providing benefits. These central systems operate in diverse environments and include everything from mainframe applications to web-enabled systems.

Both the Department's oversight of the local social service agencies and the fragmented approach to system development has created some significant security issues over access to the systems and their data. Currently, the Department controls access to its systems at two levels. The Department's Information Security Unit creates, changes, and deletes access for some of the Department's systems, and other individual divisions have their own security officers. Management of each local social service agency determines what systems and level of access individual employees should have to the Department's systems. This level of access determines what functions an individual can perform when they get into the system. Controlling access is the equivalent of determining who has access to the cash drawer or the safe.

The Department has no automated centralized records of who has access to systems and at what level. This lack of information hinders their ability to safeguard the Department's assets, as was the case with the investigation regarding employees who had improperly applied for emergency food stamps.

Additionally, the Department does not have adequate policies regarding computer system accesses with local social service agencies. Many of these agencies also had individuals who improperly applied for emergency food stamps and had access to the Department's systems. Until receiving notification of system access concerns from the local agency, the Central Office staff does not involve itself with these matters.

We recognize that the cost of addressing these issues could be cost prohibitive and that an ideal solution should come from the Department's overall strategy to replace its systems. However, there are clearly some actions that the Department could undertake in the interim to strengthen controls and provide the groundwork for the long term solution.

We believe that the Department could begin developing a personal computer based database of employees and their access. The essential information for this database could come from the data provided us in conducting our review. The Security Unit could use the access form as a data entry

tool to update the database. Over time, the Security Unit could also use the database to review and verify access.

Management Plan for Corrective Action:

System security is one of the Department's top priorities and is always, without exception, treated as such. While we agree that there is no consolidated record of system access by employee, there are records of employee access by system and these records are used to adjust system access when employees terminate or change responsibilities. In addition, the user access for every state and local employee is reviewed semiannually for propriety of access and level of access. The propriety of access authority is then certified in writing by the applicable security officer and every certification is accounted for by location. The Department uses open standard authentication for all web-developed applications and this provides the ability to see a user's access privileges across the various systems they access.

Although the Department has and will continue to consider the centralized personal computer database recommended by the auditor, we have significant concerns with timeliness and accuracy issues (i.e., access changes made in the field [by security officers in 150 locations for DSS' 13 systems] would not be recorded simultaneously in the database). The Department will explore other approaches as necessary to enhance our security in this area.

The conditions which allowed a part-time employee to create vendors and recipients and authorize payments was detected internally and corrected in October 2004. The auditor's statement that the absence of centralized access records by employee hindered the Department's ability to safeguard assets in the Food Stamp Disaster is misleading. The challenges in the Food Stamp Disaster were not attributable to the lack of centralized system access records but to USDA's relaxed policies for eligibility verification which was, in turn, aggravated by the nature and magnitude of the disaster.

The auditor's statement that "the Department does not receive notice when a local employee, P-14 or contract employee terminates, resigns or dies" is inaccurate. Although the Department does not, as the auditor indicates, receive this information from local agencies, it does receive, and act on, notifications for contract and P-14 employees. Regarding the ten terminated employees whose access was not terminated timely, the agency believes, and provided evidence to the auditors, that the access of these employees was fully eliminated within two days of termination in accordance with agency policy. Had these employees been leaving under undesirable circumstances, the access would have been terminated immediately.

The Department acknowledges that improvements in local agency computer system access would be beneficial. As such, the 2005 Information Security Memorandum of Agreement (between DSS and the local social service agencies) will be accompanied by a letter from the DSS Commissioner which emphasizes: (a) that the roles and responsibilities of the local security officers are critical to the overall security of DSS' Information Systems; (b) that security officers are responsible and accountable for promptly reporting security policy violations to the DSS security manager; and (c) that security officers have the authority to implement and act on security policies in their respective offices. The Department will also reinforce these issues in its mandated annual security officer training and recommend that the local CPAs review access terminations during the annual audits of the localities.

The Department would also point out that both the DSS Security Unit and Audit Services are involved in all system development activities at DSS to ensure inclusion of security, integrity and availability.

Responsible Position: Harry Sutton, Information Systems Director

Auditor's Response: The agency's response does not address the issues.

Information System Policies and Procedures

04-07 Modify and Adhere to Existing UNIX Policies

Applicable to: Department of Taxation

Taxation has not applied security patches to any of their servers for quite some time because of the development of the Advantage Revenue System. Taxation's UNIX security policies and procedures require operators to document deviations in set up and maintenance requirements; however, we could not locate any written exceptions related to the installation of patches. Failure to follow established policies and procedures increases the risk of loss of critical and confidential data and system failure. Taxation should document deviations from established policies and procedures.

Additionally, Taxation has removed from their policies and procedures a requirement to periodically review world writable files and directories on all UNIX systems. World writable files allow anyone with access to the system to alter the files. At the time of the audit, Taxation had not reviewed these database files and directories. Without a review of these files and directories, the security risk to Taxation's system and data cannot be determined. Taxation should add back a removed procedure from a prior version of their UNIX security policies and procedures that called for an automated periodic review of world writable files and directories on all UNIX systems.

Management Plan for Corrective Action:

TAX agrees that the UNIX policies and procedures were not being fully adhered to regarding security patches being current and that written exceptions were not developed for discrepancies with the UNIX policies and procedures at the time of APA's review. It should be noted that security patches have been applied since that time and continue to be applied on a regular basis. TAX has drafted a detailed patch management strategy for all TAX systems going forward.

TAX agrees that a periodic review of world writable files and directories on all UNIX systems, shown in a prior version of TAX's UNIX policies and procedures, should be added to the current version and that this is a necessary control in order to prevent system compromise. With the reestablishment of these policies and procedures, TAX has already begun performing quarterly reviews of world writeable files and directories on all UNIX systems. While not in APA's comment, it should be noted that while the frequency of the review was not in accordance with the referenced policies and procedures, UNIX Security Administrators were performing periodic reviews of world writable files as part of their normal systems monitoring role.

Responsible Person: Craig Drain, Manager, IT Risk Management

Estimated Completion Date: ongoing

04-08 Ensure Compliance with COV ITRM Standard SEC 2001-01.1

Applicable to: Department of Transportation

The Virginia Department of Transportation (Transportation) has not reviewed and updated the agency's risk assessment and business impact analysis in accordance with the Commonwealth of Virginia's Information Technology Policy SEC 2001-01.1. This policy states that agencies should review and update the business impact analysis and risk assessment as needed, but at minimum, the agency must do a review and update every three years or when they have a significant change in critical systems. The agency has not performed these actions since March 2001.

During the past year, Transportation transitioned their information systems to the Virginia Information Technologies Agency (VITA). Transportation has encountered common misunderstandings as to who has responsibilities for their information systems and security during and after the transition. Agency management for both VITA and Transportation still have areas of uncertainty about their comprehensive responsibilities. Transportation must work with VITA to establish written policies that define the detailed duties and responsibilities of each party. The two agencies should develop a comprehensive best practice model and establish an agreement that addresses each one of those practices.

Currently, Transportation has the responsibility to maintain and update the risk assessment and business impact analysis. However, the agency has shifted a large number of their knowledgeable personnel to VITA during the transition process. Transportation has produced a Continuity of Operations Plan (COOP), which provides some coverage in the area of risk assessment, but this does not address the business impact analysis.

Transportation must review and update the agency's risk assessment and business impact analysis to identify all aspects of the business that are confidential and critical to the agency and help identify and evaluate the potential security threats and risks that are associated to resources new to the business since March 2001. Performing these procedures will help determine if current safeguards are relevant and adequate, and then update them accordingly.

Management Plan for Corrective Action:

VDOT Security Officer will work with VDOT IT Applications Director and VITA to ensure that the requirements of SEC 2001-01.1 are incorporated into the VDOT Continuity of Operations Plan.

Responsible Position: Steve Mondul, Director of Security and Emergency Management Division

Estimated Completion Date: October 1, 2005

04-09 Improve Policies and Procedures for Security Controls on the PeopleSoft/FMSII and UNIX Systems

Applicable to: Department of Transportation

Transportation has general written policies and procedures for maintaining security controls on the various systems in use at Transportation; however, the policy does not specifically address the PeopleSoft/FMSII and UNIX systems.

A review of general IT controls revealed that there are several administrative functions, both performed and unperformed, that are not documented in the current IT policy. Transportation should develop a policy that includes specifications for maintaining security controls for these systems.

These documented policies and procedures would allow Transportation to maintain proper administration of their systems. Specific policies and procedures provide direction on establishing what controls management deems necessary and therefore, what restrictions to impose for the system. Failure to implement proper policies and procedures could lead to improper controls placed on the system and allow for unauthorized access, placing the integrity and completeness of the data stored on the system at risk.

We recommend that Transportation implement specific policies for the proper administration of these systems as soon as possible and follow these procedures for maintaining security of the systems. This is especially important at Transportation, given the enormous amount of activity dependent on these systems.

Management Plan for Corrective Action:

Review existing written policies and procedures related to FMS II and UNIX systems to ensure adequate controls are in place and responsibilities are clearly defined.

*Responsible Positions: Murali Rao, Director of Information Technology Applications Division
Stacy McCracken, Controller*

Estimated Completion Date: July 1, 2005

04-10 Update COOP Plan

Applicable to: Department of Health

The Virginia Department of Health lacks an updated and complete version of its Continuity of Operations Plan (COOP). An incomplete COOP plan does not comply with the COV ITRM Standard SEC2001-01.1. While reviewing the plan, it was noted that portions of the agency's Disaster Recovery and Risk Assessment plans were incomplete, resulting in violation of the first attribute (Business Analysis and Risk Assessment) of the COV ITRM Standard SEC2001-01.1. Some of the following sections of the Disaster Recovery Plan were incomplete: Application Descriptions & Procedures, Disaster Notification List, Vendor Contact Information, and Backup-procedures. An incomplete COOP plan could result in the inability to recover critical systems or data in the event of a disaster. Without an updated Disaster Recovery Plan, the incorrect procedures could be followed by the agency during a critical response time.

We recommend that the Office of Information Management (OIM) update and fully document its COOP Plan. In addition to the sections listed above, OIM should include all Information Systems components into their Contingency and Business Impact Analysis and Risk Assessment plans. Critical servers, firewalls, routers, and applications should be included in the Contingency, Business Impact Analysis, and Risk Assessment plans. This inclusion will ensure that all critical components and information systems are accounted for and assessed within the agency's operations and recovery plans.

Management Plan for Corrective Action:

We concur with this finding and agree to draft an OIM section for the COOP.

Responsible Position: Kenny White, OIM/VITA Engineering Manager

Estimated Completion Date: March 1, 2005

04-11 Improve and Implement Security Standards for Client Agencies

Applicable to: Virginia Information Technologies Agency

The Commonwealth has implemented and maintained decentralized information system security for the past 15 years. Before the creation of VITA, each agency had to follow general standards created by the Department of Technology Planning (now part of VITA). Effective December 7, 2001, the current security standard (SEC-2001) replaced an older version of the standard, which had been a modification of past standards such as Council of Information Management's standard (CIM-95-1).

The current standard has 13 attributes that clarify agencies' responsibilities towards securing their information systems. This standard is general and non-technology or vendor specific, so that agencies have leeway to determine what works best in their environment. While this approach leaves room for judgment, it equally leaves open an opportunity to ignore detailed security features. Most technologies at the application level, operating system level, database level, and network component level now have security standards and guidelines based on "best practices" from the federal government and industry. These best practices are common for vendor specific equipment such as Cisco routers. The National Security Agency Router Security Configuration Guideline describes effective ways to secure Cisco routers. The same types of configuration standards and guidelines exist for UNIX, Oracle, Firewalls and more.

A lack of detailed guidelines and standards for configurations within the Commonwealth has led to a patchwork approach to security. Some agencies are extremely security conscious, while others are not. In the past, the Secretary of Technology as the Chief Information Officer of the Commonwealth had the authority to "direct the formulation and promulgation of policies, standards, specifications and guidelines for information technology in the Commonwealth." This authority per legislation has now passed this responsibility onto the newly hired Chief Information Officer who heads VITA. This authority encompasses not only in-scope agencies that transition to VITA but other agencies and universities as well.

Historically, each agency head has had responsibility for the security over their agency systems. As VITA absorbs the agency information system professionals and their knowledge, it is incumbent upon VITA to make sure that they increase their share of the security responsibility. As

the centralized technology agency for the Commonwealth, it is now time for VITA to address the lack of detailed security guidance and coordinate who implements and maintains security.

During our audit, we found improper security configurations, such as risky services enabled and improper file permissions on a Department of Tax (Tax) server managed by VITA. Tax gave VITA a UNIX Standard to follow for managing their UNIX servers; however, VITA is not following this standard.

The above is symptomatic of a much larger issue as VITA absorbs more responsibility for the Commonwealth's computing architecture. VITA has developed generic Memorandum of Agreements (MOAs) for servicing their client agencies. These agreements do not specifically address information security concerns other than to state that VITA, as custodian of client's data, will ensure that the data is not available to unauthorized users.

The lack of detailed security information in the MOAs requires VITA to take steps to avoid miscommunication of roles and responsibilities of each party. We recommend VITA take the following actions to ensure the security over the Commonwealth's systems.

- VITA create and distribute to the client agencies a detailed checklist that defines the roles and responsibilities for information security.
- VITA create or define the "Industry Best Practices" for detailed security configuration standards in our computing environment to include configurations at the operating system level, database level, and network component level.
- VITA use the configuration standards to manage client agencies systems and in cases of potential disagreement, miscommunication, or other questions, take actions to protect the data pending resolution of the matter with the client agency.
- VITA review and correct the Department of Tax server configuration issues.

Management Plan for Corrective Action:

We are pleased that only one exception was noted in relation to a server owned by the Department of Taxation and managed at VITA. The following are the four APA recommendations associated with that exception and the corrective actions VITA will take to address them.

APA Recommendation 1: *VITA create and distribute to the client agencies a detailed checklist that defines the roles and responsibilities for information security.*

VITA Response: *VITA's Security Director has created a checklist to explain the roles and responsibilities for VITA and those of customer agencies in information security. VITA's Enterprise Service Directors are currently in the process of providing this document to responsible agency staff for comment and acceptance. VITA's Security Director will finalize the document and ensure acceptance and understanding by agency management by October 1, 2004.*

APA Recommendation 2: VITA create or define the “Industry Best Practices” for detailed security configuration standards in our computing environment to include configurations at the operating system level, database level, and network component level.

VITA Response: VITA Security will develop an action plan to address this recommendation by October 1, 2004. The timeframe for implementation is dependent upon resources and funding. Initial start up funding has been approved for Risk Assessment and Security Incident Management for FY05.

APA Recommendation 3: VITA use the configuration standards to manage client agencies systems and in cases of potential disagreement, miscommunication or other questions, takes actions to protect the data pending resolution of the matter with the client agency.

VITA Response: VITA will adopt the configuration standards and in cases of potential disagreement, miscommunication or other questions, take appropriate action to protect the data pending resolution of the matter with the customer agency. Such immediate actions will be determined based on a case specific risk assessment. VITA will mitigate the risk of adverse impact to agency business services or operations by working closely with each customer agency. VITA Security will develop a policy and procedure to govern this process and put it in place by October 1, 2004.

APA Recommendation 4: VITA review and correct the Department of Taxation server configuration issues.

VITA Response: The standard that applies to management of this server is based on “Industry Best Practices” and was finalized in December 2003. It was developed jointly by VITA and Taxation. At the time the standard was finalized Taxation elected not to make changes as a result of weighing limited security exposure against business process risk should a failure occur. Taxation’s infrastructure has not yet been consolidated into VITA. Steps are underway to completely resolve issues with configuration of the server belonging to the Department of Taxation. Actions have been completed to remove world writable files that would not impact applications and to disable unused network services and other candidate services identified by Taxation. File permissions will be documented and provided to VITA by the Department of Taxation by August 2, 2004. The server will be managed by VITA in accord with best practice standards and procedures. A joint change management process will be established monthly for ongoing assurance.

We appreciate the valuable work done by APA staff on this audit and look forward to the opportunity for continuing dialogue and guidance from APA as VITA completes the transition of agency infrastructure and moves into the transformational stage of the IT reform initiative.

Responsible Position: Security Director

Estimated Completion Date: October 1, 2004

Information System Development

04-12 Properly Plan Systems Development Projects

Applicable to: Department of Social Services

The Department has been planning an Integrated Social Service Delivery System (ISSDS) and recently received a Public-Private Education Facilities and Infrastructure Act (PPEA) proposal. Although the Department has both a business plan and information technology strategy plan, it is not linking these processes together with this system effort. Considering that the Department estimates that the ISSDS will cost at least \$128 million, this lack of planning draws into question how the Department will evaluate this PPEA and any other proposals.

While we understand that the Department's systems are old and probably require replacement, having a common vision and understanding of the needs is essential for project management of an undertaking this size. We understand that several local government social service agencies have expressed concerns about the scope of the project, and have concerns about the Department's history of unsuccessful system implementation. Considering the local social service agencies constitute the largest users of any system, we believe that they should participate in this process and help with the planning.

The delivery of social service programs has changed in the Commonwealth over the last decade and these changes have shifted some responsibilities between the Central Office and the local agencies. These changes have placed different needs and approaches to having information to effectively monitor the programs. The plan submitted to Virginia Information Technologies Agency does not indicate that these changes were given adequate consideration.

Effective system implementation requires a clear vision of where the Department is going and how it will get there. Beginning a major project that does not involve all parties limits the chance of success. Considering the Department's history of system implementation, we recommend that they complete and link both its business plan and information technology strategy plan and involve as many stakeholders as reasonably possible.

Management Plan for Corrective Action:

The Department does not agree that there is no linkage between DSS' Strategic Business Plan, DSS' Information Technology (IT) Strategic Plan and the Integrated Social Service Delivery System (ISSDS). Although the reporting format used by the Virginia Information Technologies Agency (VITA) for IT Strategic Plans does not reflect linkages to agency-specific business plans, DSS' business and IT strategic processes for ISSDS are, in reality, strongly, actively and formally linked. In fact, Goal 3 of DSS' Strategic Business Plan requires us to "improve business productivity through effective automation." Not only is the Goal 3 Steering Committee jointly chaired by DSS and local agency management but ISSDS business direction is one of the priority goals of this committee. The committee meets monthly and continuously provides direction to DSS on the ISSDS project. Besides DSS and local agency personnel, the Goal 3 Steering Committee includes staff from VITA, the Department of Medical Assistance Services, the Virginia League of Social Services and the Virginia Community Action Partnership.

Contrary to the auditor's comments, the plan submitted to VITA did include and reflect consideration of the ongoing changes in the delivery of social service programs. Business Process Re-engineering (BPR), begun in early 2004 and also jointly chaired by state and local personnel, is a

major ISSDS-related initiative which involves a comprehensive examination of all social services processes at both the state and local level. BPR is, in fact, the largest social services business review in the history of Virginia. Local agency staff is driving this effort and local agency needs have been the priority.

The Department believes that the level of local agency involvement, as well as the active participation of other state and community entities, demonstrates a strong link between DSS' business and strategic plans and the ISSDS project and inclusion of a broad spectrum of stakeholders.

Responsible Position: Harry Sutton, Information Systems Director

Auditor's Response: The agency's response does not address the issues.

FEDERAL AWARD FINDINGS AND QUESTIONED COSTS**U.S. DEPARTMENT OF EDUCATION****Special Tests and Provisions****04-13 Properly Administer Return of Title IV Funds**Financial Aid
Cluster

Applicable to: Danville Community College
Lord Fairfax Community College
Rappahannock Community College
Tidewater Community College

Control and Compliance Findings: Tidewater Community College failed to properly calculate Title IV refund amounts. Danville Community College and Lord Fairfax Community College performed Title IV refunds accurately. However, Lord Fairfax did not return federal funds to the Department of Education timely and Danville did not return any federal funds to the federal Department of Education in the 2003-2004 academic year; however Danville has since returned all identified funds to the federal Department of Education. Lord Fairfax Community College did not notify students of grant overpayments promptly. Danville Community College did not notify the federal Department of Education of students who had not repaid any overpayments within the required time period. Additionally, Tidewater Community College and Rappahannock Community College do not have adequate procedures to identify students who withdraw or cease attendance without notifying college staff.

There are no questioned costs reported because at three of the four institutions, the known or likely questioned costs are less than \$10,000, and the fourth institution subsequently returned all identified funds.

Requirement: 34 CFR Part 668.22 (c), requires that colleges have mechanism in place to identify students who have withdrawn or ceased attendance, in order to promptly and properly calculate any return of Title IV funds. Part 668.22 (e) sets forth the manner to properly calculate the amounts due to be refunded to the Title IV programs. Part 668.22 (j) requires that colleges return unearned Title IV funds as soon as possible to the federal Department of Education, but no later than 30 days after the college determined the student withdrew. Part 668.22 (h) requires that within 30 days of the date that the college determines that the student withdrew, the college must send a notice to the student notifying them of any over-award amounts owed. This part also requires that any over-award amounts owed by the student are required to be turned over to the Department of Education for collection if the student has not responded within 45 days after notification.

Recommendation: Colleges should follow the return of Title IV fund procedures prescribed by the federal government to ensure that they

properly identify students who withdraw, calculate refunds, notify students of over-award amounts owed, and return the funds to the federal Department of Education promptly.

Management Corrective Action Plan

Response: Danville Community College

Action: *Danville Community College will ensure that Title IV funds owed to the U.S. Department of Education are returned within 30 days of the date the College becomes aware of the student withdrawals. The College will ensure that student repayment obligations are reported to the Department of Education if students fail to repay within 45 days.*

Implementation: *March 2005*

Responsible: *Financial Aid Coordinator*

Response: Lord Fairfax Community College

Action: *The College has implemented the process of contacting professors at the sixty percent point in the semester for attendance verification instead of waiting for grades to be posted after the semester has ended. This allows the College to notify the students of grant overpayments and return Title IV funds to the Department of Education on a timely basis.*

Implementation: *July 2004*

Responsible: *Director of Enrollment Services*

Response: Rappahannock Community College

Action: *The Rappahannock Community College Handbook has been updated to require instructors to report the last date of attendance on the grade roster for all students who receive a grade of failing or unsatisfactory. In order to properly calculate a return of Title IV funds, the Financial Aid Office utilizes the last date of attendance on the instructor's grade roster to identify financial aid students who withdrew or ceased attendance prior to the sixty percentile point of the semester without notifying college staff. In addition, the Financial Aid Officer has reinstated the class attendance verification notifications. In the past, the Financial*

Aid Office sent email reminders to any faculty member whose students have all failing, withdrawal or unsatisfactory grades that had not notified the Admissions and Records or Financial Aid Office. If no response was received, it was assumed attendance was not a problem. Follow-up notices are now sent to all faculty that do not respond to the first reminder to ensure accurate information is recorded on the student's record for processing return of Title IV funds.

Implemented: July 2004

Responsible: Vice President of Academic and Student Affairs and Dean for Student Development

Response: Tidewater Community College

Action: Tidewater Community College converted to the PeopleSoft Student Information System (SIS) during summer semester 2003 and began using the return of Title IV calculations in PeopleSoft for fall 2003. Several system problems were encountered in the student records and financial aid modules. The College actively sought solutions working with other colleges and with the VCCS. As a result of these problems, return to Title IV calculations were done manually. Staff turnover contributed to the calculation errors.

The SIS problems have since been corrected. The College has established a new procedure that requires faculty to verify student attendance at specific intervals. The administration will complete withdrawals for students that have ceased attendance.

Implementation: March 2005

*Responsible: Director, Central Financial Aid
Deans, Academic and Student Services*

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

Allowable Costs/Cost Principles

04-14 Ensure Timely Credit to Medicaid program

Medicaid
Cluster

Applicable to: Department of Medical Assistance Services

Control and Compliance Finding: The Department failed to return the Federal Financial Participation (FFP) for un-cashed checks for the first three quarters of fiscal year 2004. The new MMIS system was not operating as intended; however, there were no interim procedures in place to ensure compliance. The Department is currently in the process of finalizing policies and procedures to ensure timely return of FFP for uncashed checks.

Requirement: 42 CFR Part 433.40 of the Code of Federal Regulations requires refunds of Federal Financial Participation (FFP) for checks remaining un-cashed beyond a period of 180 days from the date it was issued. The State Medicaid agency must refund all FFP received for un-cashed checks by adjusting the applicable Quarterly Statement of Expenditures.

Recommendation: The Department should finalize policies and procedures to ensure timely return of FFP for uncashed checks.

Management Corrective Action Plan:

The 180-Day Check Void Process was implemented and successfully run in September 2004. The Program Support Division forwarded an excerpt from the 180-Day Outstanding Six Month Report (Report Number FN-0-034) dated July 20, 2004 to the Fiscal Division. All of the checks (some dating back to 2003) were reviewed by Program Support to determine whether each check was cashed or remained outstanding. After this research effort, appropriate checks were voided as of September 1, 2004. Program Support provided Fiscal with a copy of the voided check report, dated September 8, 2004.

The process improvement effort continues at DMAS and First Health under the guidance of Information Management. The Program Support Division provided the Fiscal Division with current working copies of the following:

- Issue Add Pay/Manual Checks*
- Stop/Reissue Manual Checks*
- Process Provider/Vendor Checks (Category 1 * undelivered program checks to be voided).*

*Responsible Position(s): Alan MacDonald, Information Management
Division Director
Paul Kirtz, Acting Controller*

Estimated Completion Date: May 1, 2005

Activities Allowed or Unallowed

04-15 Strengthen Case File Documentation

Medicaid
Cluster

Applicable to: Department of Medical Assistance Services

Control and Compliance Finding: The Department's Consumer-Directed Personnel Attendant Services (CDPAS) Provider Manual states that the consumer-directed services facilitator must make in-home visits to CDPAS recipients to observe, evaluate, and document the adequacy and appropriateness of the personal attendant services. In the cases reviewed, evidence did not support determination of adequacy and appropriateness of personal attendant services. In addition, there was no evidence to indicate that the Department enforced the requirements before making payments to the provider.

In June 2004, the Internal Audit Department conducted and released a Control Self Assessment Report on this program in which the foregoing finding was addressed. This finding is under review, and the Department is working to determine the best solution to the internal control issues.

Requirement: OMB Circular A-133 Compliance Supplement Part 4, 93.778, requires adequate documentation for case management services. This typically includes: date of service; name of recipient; name of provider agency and person providing the service; nature, extent, or units of service; and, place of service.

Recommendation: The Department needs to make sure that all individuals responsible for case management understand the need and document information in the case file. This requirement is especially important if the caseworkers grant exceptions or allow recipients some flexibility in benefits received. Further, if regulation or manual policies and procedures are outdated, management should change the manual and requirement rather than caseworkers not documenting their work.

Management Plan for Corrective Action:

The Department will ensure that personal attendant services provided are adequate and appropriate and that performance of required services is adequately documented prior to provider payment being made. In addition, the CDPAS Provider Manual will be revised to reflect Federal policy regarding service provision.

Responsible Position: Diana Thorpe, LTC and Quality Assurance Division Director

Estimated Completion Date: March 1, 2005

Special Tests and Provisions

04-16 Improve Documentation of Certain Temporary Assistance to Needy Families

93.558 Applicable to: Department of Social Services

Control and Compliance Finding: Federal regulations require the Department to reduce or eliminate a recipient's benefits if the recipient fails to cooperate with the Division of Child Support Enforcement Agency (DCSE). In 2 out of 14 TANF cases tested, we found no documentation of benefits reductions because the custodial parent failed to cooperate with DCSE. In addition, for 1 of the 14 selected cases, the case file did not contain documentation showing that DCSE referred a non-cooperating case to the local social services office.

Federal regulations state that the Department may not reduce or terminate benefits if the recipient refuses to work because of a demonstrated inability to obtain necessary childcare for a child under the age of six. In four out of five TANF cases selected, the case file did not contain adequate documentation to show that the eligibility worker took good cause (unavailable childcare) into consideration before suspending a recipient's TANF benefits for refusing to work. The Department's TANF policies require that when a client does not comply with the VIEW requirements, the caseworker will send an "advanced notice of proposed action" to the client and retain it in the case file. This advanced notice of proposed action documents that the eligibility worker has considered good cause.

Requirement: 45 CFR section 264.30 requires the Child Support Enforcement Agency to notify the TANF Agency when a custodial parent is not cooperating in establishing paternity or modifying/enforcing a support order. 45 CFR section 261.15 states that a parent cannot be penalized for refusing to work when child care is not available.

Recommendation: The Department should ensure that TANF case files contain adequate supporting documentation to show compliance with federal regulations.

Management Plan for Corrective Action:

Although the Department questions the adequacy of the sample sizes in the auditor's tests, the following action will be/has been taken:

(1) To reduce errors in non-cooperation documentation, the Department will, by March 2005: (a) provide training to local agencies; and (b) incorporate the non-cooperating factor into our ongoing monitoring procedures. In July 2005, the Department will automate the notification of non-cooperation.

(2) To improve documentation of good cause consideration, the Department took these steps in December 2004: (a) conducted training; (b) implemented a checklist requiring supervisory sign-off prior to sanction; and (c) established procedures requiring personal contact with the client before ceasing benefits. In addition, review of this process will become part of our ongoing monitoring procedures in March 2005.

We would point out that none of the cited errors violated federal regulations.

Responsible Position: S. Duke Storen, Director of Benefit Programs

Estimated Completion Date: (1) July 2005
(2) March 2005

INDEPENDENT AUDITOR'S REPORT ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

We have audited the basic financial statements of the Commonwealth of Virginia as of and for the year ended June 30, 2004, and have issued our report thereon dated December 14, 2004. These financial statements are the responsibility of the Commonwealth's management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit federal assistance programs for the agencies and component units discussed in Note 1 of the "Notes to the Schedule of Expenditures of Federal Awards."

We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying "Schedule of Expenditures of Federal Awards" is presented for the purpose of additional analysis, as required by OMB Circular A-133, and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the Governor and General Assembly of Virginia, management, federal awarding agencies, and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties. However, this report is a matter of public record and its distribution is not limited.

Welfare Reform Research, Evaluations and National Studies	93.595	(59,974)		
Grants to States for Access and Visitation Programs	93.597	188,002		
Chafee Education and Training Vouchers Program (ETV)	93.599	185,683		
Head Start	93.600	225,550	1,192,966	Richmond Public Schools
Adoption Incentive Payments	93.603	150,940		
Voting Access for Individuals with Disabilities-Grants to States	93.617	539,069		
Voting Access for Individuals with Disabilities-Grants for Protection and Advocacy Systems	93.618	10,849		
Developmental Disabilities Basic Support and Advocacy Grants	93.630	2,639,335		
Developmental Disabilities Projects of National Significance	93.631	158,171		
University Centers for Excellence in Developmental Disabilities Education, Research and Service	93.632	394,877		
Children's Justice Grants to States	93.643	315,508		
Child Welfare Services State Grants	93.645	4,694,122		
Child Welfare Services Training Grants	93.648	21,605		
Adoption Opportunities	93.652	81,314		
Foster Care - Title IV-E	93.658	90,357,778		
Adoption Assistance	93.659	14,620,649		
Social Services Block Grant (SSBG)	93.667	62,596,879		
Child Abuse and Neglect State Grants	93.669	541,541		
Family Violence Prevention and Services/Grants for Battered Women's Shelters-Grants to States and Indian Tribes	93.671	1,863,083		
Chafee Foster Care Independent Living	93.674	1,461,204		
State Children's Insurance Program (SCHIP)	93.767	60,026,452		
Medicaid Infrastructure Grants To Support the Competitive Employment of People with Disabilities	93.768	742,901		
Medical Assistance Program	93.778	51,747,591		
Centers for Medicare and Medicaid Services (CMS) Research, Demonstrations and Evaluations	93.779	1,001,713		
Health Careers Opportunity Program	93.822	555,661		
Basic/Core Area Health Education Centers	93.824		2,000	Southwest VA Health Education Center
Heart and Vascular Diseases Research	93.837	532		
Blood Diseases and Resources Research	93.839	175,010		
Extramural Research Programs in the Neurosciences and Neurological Disorders	93.853		98	University of Pittsburgh
Microbiology and Infectious Diseases Research	93.856	1,523	44,505	Federal University Of Bahia, Brazil
Pharmacology, Physiology, and Biological Chemistry Research	93.859	215,145	2,713	Hampton University

COMMONWEALTH OF VIRGINIA
Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2004

Federal Department/Program	CFDA Number	Direct	Indirect	Pass-Through Entity Name (Indirect Only)
Child Health and Human Development Extramural Research	93.865	212,571		
Medical Library Assistance	93.879	26,570	18,037	University of Maryland
Grants for Residency Training in General Internal Medicine and/or General Pediatrics	93.884	737,307		
Project Grants for Non-Acute Care Intermediate and Long-Term Care	93.887	811,580		
Facilities for Patients with AIDS				
Rural Health Outreach and Rural Network Development Program	93.912	515,479		
Grants to States for Operation of Offices of Rural Health	93.913	141,873		
HIV Care Formula Grants	93.917	24,046,997		
Grants to Provide Outpatient Early Prevention Services with Respect to HIV Disease	93.918	590,808		
Healthy Start Initiative	93.926	921,561		
Fogarty International Research Collaboration Award	93.934	18,403		
Cooperative Agreements to Support School Health Education to Prevent the Spread of Acquired Immunodeficiency Syndrome	93.938	228,958		
HIV Prevention Activities - Health Department Based	93.940	4,837,765		
Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Virus Syndrome (AIDS) Surveillance	93.944	497,502		
Assistance Program for Chronic Disease Prevention and Control	93.945	1,355,370		
Improving EMS/Trauma Care in Rural Areas	93.952	47,546		
Block Grants for Community Mental Health Services	93.958	12,354,609		
Block Grants for Prevention and Treatment of Substance Abuse	93.959	43,051,342		
Health Administration Graduate Traineeships	93.962	56,638		
Geriatric Education Centers	93.969	276,231		
Preventive Health Services - Sexually Transmitted Diseases Control Grants	93.977	2,224,957		
Mental Health Disaster Assistance and Emergency Mental Health	93.982	2,455,270		
Cooperative Agreements for State-Based Diabetes Control Programs and Evaluation of Surveillance Systems	93.988	319,068		
International Research and Research Training	93.989	(23,475)	24,792	University of Memphis
Preventive Health and Health Services Block Grant	93.991	2,474,632		
Maternal and Child Health Services Block Grant to the States	93.994	12,393,423		
Bioterrorism Training and Curriculum Development Program	93.996	799,825		
Other Assistance	93.000	639,807		
Total Excluding Clusters Identified Below		738,685,077	2,216,516	
Aging Cluster:				
Special Programs for the Aging - Title III, Part B - Grants for Supportive Services and Senior Centers	93.044	10,663,058		
Special Programs for the Aging - Title III, Part C - Nutrition Services	93.045	9,275,217		
Nutrition Services Incentive Program	93.053	2,419,628		
Total Aging Cluster		22,357,903		
Student Financial Assistance Programs Cluster:				
Health Professions Student Loans, Including Primary Care Loans/Loans for Disadvantaged Students	93.342	8,283,923		
Nursing Student Loans	93.364	1,594,811		
Scholarships for Health Professions Students from Disadvantaged Backgrounds	93.925	217,868		
Total Student Financial Assistance Programs Cluster		10,096,602		
Child Care Cluster:				
Child Care and Development Block Grant (CCDF)	93.575	76,818,114		
Child Care Mandatory and Matching Funds of the Child Care and Development Fund	93.596	50,551,730		
Total Child Care Cluster		127,369,844		

COMMONWEALTH OF VIRGINIA
Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2004

Federal Department/Program	CFDA Number	Direct	Indirect	Pass-Through
				Entity Name (Indirect Only)
Medicaid Cluster:				
State Medicaid Fraud Control Units	93.775	1,638,347		
State Survey and Certification of Health Care Providers and Suppliers	93.777	4,506,740		
Medical Assistance Program	93.778	2,155,011,558		
Total Medicaid Cluster		2,161,156,645		
Research and Development Cluster:				
Medical Reserve Corps Small Grant Program	93.008	9,900		
Food and Drug Administration - Research	93.103	27,275	85,755	Iowa State University
Food and Drug Administration - Research	93.103		783	Johns Hopkins University
Minority International Research Training Grant in the Biomedical and Behavioral Sciences	93.106	126,115		
Maternal and Child Health Federal Consolidated Programs	93.110	601,864	41,626	University Of Pennsylvania
Biological Response to Environmental Health Hazards	93.113	805,714	48,385	Michigan State University
Applied Toxicological Research and Testing	93.114	27,606		
Biometry and Risk Estimation-Health Risks from Environmental Exposures	93.115		49,277	Georgia Institute Of Technology
Acquired Immunodeficiency Syndrome (AIDS) Activity	93.118	68,672		
Oral Diseases and Disorders Research	93.121	4,050,000	45,479	University Of Texas
Oral Diseases and Disorders Research	93.121		6,028	Boston University School of Medicine
Oral Diseases and Disorders Research	93.121		68	University of Iowa
Technical and Non-Financial Assistance to Community Health Centers	93.129	19		
Grants to Increase Organ Donations	93.134		99,605	Lifenet
Centers for Research and Demonstration for Health Promotion and Disease Prevention	93.135	15,000		
Injury Prevention and Control Research and State and Community Based Programs	93.136	1,104,515		
Coordinated Services and Access to Research for Women, Infants, Children, and Youth	93.153	248,379		
International Cooperative Biodiversity Groups Program	93.168	562,255

COMMONWEALTH OF VIRGINIA

NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

FOR THE YEAR ENDED JUNE 30, 2004

1. PURPOSE OF THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations, requires a schedule of expenditures of federal awards showing total federal expenditures for each federal financial assistance program as identified in the Catalog of Federal Domestic Assistance (CFDA). The accompanying schedule includes all expenditures of federal awards of the Commonwealth of Virginia's departments, institutions, authorities, and component units except for the entities that were not audited by the Auditor of Public Accounts. Other auditors issued reports for the following organizations within the Commonwealth: Commission on the Virginia Alcohol Safety Action Program, Virginia Commonwealth University Health System Authority, Virginia Housing Development Authority, Virginia Resources Authority, and the Virginia State Crime Commission.

2. SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

The information in the accompanying "Schedule of Expenditures of Federal Awards" is presented in accordance with OMB Circular A-133. The schedule presents a summary of direct and indirect federal financial assistance by federal department and CFDA Number.

Federal Financial Assistance – The Single Audit Act Amendments of 1996 (Public Law 104-156) and OMB Circular A-133 define federal financial assistance as grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, or other assistance. Nonmonetary federal assistance including food stamps, food commodities, and surplus property, is considered federal assistance and, therefore, is reported on the "Schedule of Expenditures of Federal Awards." Federal financial assistance does not include direct federal cash assistance to individuals. Solicited contracts in a vendor relationship between the Commonwealth of Virginia and the federal government for which the federal government procures tangible goods or services are not considered to be federal financial assistance.

Direct Federal Assistance – Assistance received directly from the Federal government or received in a pass-through relationship from other State entities is classified as direct expenditures on the "Schedule of Expenditures of Federal Awards."

Indirect Federal Assistance – Assistance received in a pass-through relationship from entities other than the Federal government or other State entities is classified as indirect expenditures on the "Schedule of Expenditures of Federal Awards."

Major Programs – The Single Audit Act Amendments of 1996 and OMB Circular A-133 establish the criteria to be used in defining major programs. Major programs for the Commonwealth of Virginia were determined using a risk-based approach in accordance with OMB Circular A-133.

Catalog of Federal Domestic Assistance – The Catalog of Federal Domestic Assistance (CFDA) is a government-wide compendium of individual federal programs. Each program included in the catalog is assigned a five-digit program identification number (CFDA Number) which is reflected in the accompanying schedule.

Cluster of Programs – Closely related programs that share common compliance requirements are grouped into clusters of programs. A cluster of programs is considered as one federal program for determining major programs. The following are the clusters administered by the Commonwealth: Food Stamp, Child Nutrition, Emergency Food Assistance, Schools and Roads, Public Works and Economic Development, CDBG Entitlement and Small Cities Cluster, Fish and Wildlife, Employment Services, WIA, Highway Planning and Construction, Federal Transit, Highway Safety, Student Financial Assistance Programs, Special Education, TRIO, Aging, Child Care, Medicaid, Disability Insurance/SSI, and Research and Development. Research and Development, Student Financial Assistance Programs, and Highway Planning and Construction clusters expend funds from several Federal departments. The amount expended for these three clusters are reported under the appropriate federal department. The total amount expended for Student Financial Assistance was \$817,595,927 consisting of \$ 807,499,325 from the Department of Education and \$10,096,602 from the Department of Health and Human Services. The total amount expended for Highway Planning and Construction was \$618,690,064, consisting of \$618,624,782 from the Department of Transportation and \$65,282 from the Appalachian Regional Commission. The total amount expended for Research and Development was \$426,598,102 consisting of the following federal departments:

<u>Federal Department</u>	<u>Amount Expended</u>
Department of Health and Human Services	\$ 227,627,382
National Science Foundation	54,055,079
Department of Defense	45,881,942
National Aeronautics and Space Administration	22,773,286
Department of Agriculture	17,058,445
Department of Commerce	13,095,493
Department of Education	12,612,651
Department of Energy	10,201,977
Department of Transportation	8,668,908
Other Federal Assistance	3,503,324
Department of the Interior	3,075,613
Environmental Protection Agency	2,912,010
Department of Justice	1,559,101
National Foundation on the Arts and the Humanities	1,340,227
General Services Administration	727,161
Department of Housing and Urban Development	283,387
Federal Emergency Management Agency	220,688

Securities and Exchange Commission	168,198
Tennessee Valley Authority	161,474
National Archives and Records Administration	119,331
Office of Personnel Management	113,789
Department of Homeland Security	102,695
Department of State	98,504
Agency for International Development	89,686
Department of Veterans Affairs	55,092
Institute of Peace	45,025
Social Security Administration	31,890
Appalachian Regional Commission	10,829
Department of Labor	4,914

\$ 426,598,102

B. Basis of Accounting

Federal program expenditures included in the accompanying schedule are presented using the cash basis of accounting. Under the cash basis of accounting, expenditures are recognized when paid rather than when the obligation is incurred. Federal non-cash assistance and loan/loan guarantee program activities are presented as described in Notes 2-C and 2-D below.

C. Non-Cash Assistance

The Commonwealth of Virginia participated in several federal programs in which non-cash benefits are provided through the state to eligible program participants. These include:

Food Distribution Programs (CFDA Numbers 10.555, 10.565, 10.569, 10.559) – The value of food commodities was calculated using the U.S. Department of Agriculture’s Food and Nutrition Service commodity price lists. The accompanying schedule includes commodity distributions of \$21,765,474, \$239,182, \$1,618,474, and \$10,754,521 for CFDA Numbers 10.555, 10.559, 10.565, and 10.569 respectively. The accompanying schedule does not include Commonwealth-stored undistributed food commodities of \$1,361,852 and \$455,281 for CFDA Numbers 10.555 and 10.565 respectively.

Donation of Federal Surplus Personal Property (CFDA Number 39.003) – Donated federal surplus property is valued at 23.3 percent of the original acquisition cost as assigned by the federal government. The amount included in the accompanying schedule reflects distribution to other governmental entities during the year ended June 30, 2004. Administrative expenditures of \$1,040,896 are not included in the accompanying schedule. The value of surplus property on hand at June 30, 2004 totaled \$1,855,875.

Childhood Immunization Grants (CFDA Number 93.268) – The U.S. Department of Health and Human Services purchases and distributes immunizations to the Virginia Department of Health for use by the local health departments. The amount presented

in the accompanying schedule reflects the cost of immunizations to the federal government of \$12,257,132. The remaining amount of \$4,975,345 is administrative expenditures. The value of inventory on hand at June 30, 2004 was \$4,932,755.

D. Loan/Loan Guarantee Programs

Family Federal Education Loans (CFDA Number 84.032) – The amount in the accompanying schedule reflects the value of new Stafford, PLUS, and SLS loans disbursed to students during the fiscal year.

Federal Perkins Loans - Federal Capital Contributions (CFDA Number 84.038) – The amount in the accompanying schedule includes administrative costs during the fiscal year as well as the outstanding balance of loans receivable at June 30, 2004.

Federal Direct Loan Program (CFDA Number 84.268) – The amount in the accompanying schedule reflects the value of new Federal Direct Loans disbursed to students during the fiscal year.

Health Professions Student Loans, Including Primary Care Loans/Loans for Disadvantaged Students (CFDA Number 93.342) – The amount in the accompanying schedule includes administrative costs during the fiscal year as well as the outstanding balance of loans receivable at June 30, 2004.

Nursing Student Loans (CFDA Number 93.364) – The amount in the accompanying schedule includes administrative costs during the fiscal year as well as the outstanding balance of loans receivable at June 30, 2004.

College Housing and Academic Facilities Loans (CFDA Number 84.142) – The amount in the accompanying schedule reflects the outstanding balance of loans payable at June 30, 2004.

Capitalization Grants for State Revolving Funds (CFDA Number 66.458) and Capitalization Grants for Drinking Water State Revolving Fund (CFDA Number 66.468) – The amounts in the accompanying schedule reflects disbursements for administrative costs and distributions to the Virginia Resources Authority for subsequent disbursement to subrecipients.

Economic Adjustment Assistance (CFDA Number 11.307) – The amount in the accompanying schedule reflects the cash on hand and the outstanding balance of loans receivable from subrecipients at June 30, 2004.

E. Emergency Unemployment Benefits

The amount included in the accompanying schedule for Unemployment Insurance (CFDA Number 17.225) includes \$54,071,958 administrative costs, \$21,346,326 federal unemployment benefits paid to federal employees, \$699,683 federal disaster unemployment benefits paid to federal and non-federal employees, \$87,068,399 Temporary Extended Unemployment Compensation paid to all benefit recipients, and \$477,289,055 state unemployment benefits paid to non-federal employees.

F. Program Expenditures

Certain transactions relating to federal financial assistance may appear in the records of more than one state recipient agency. To avoid duplication and the overstatement of the aggregate level of federal financial assistance expended by the Commonwealth of Virginia, the following policies have been adopted:

1. When federal financial assistance is received by one state recipient agency and redistributed to another state agency (i.e., a pass-through of funds by the primary recipient state agency to a subrecipient state agency), the federal financial assistance will be reflected as expenditures by the subrecipient state agency.
2. When federal financial assistance is received by one state agency to purchase goods or services from another state agency, the federal financial assistance will be reflected as expenditures by the recipient (purchaser) agency.

3. OTHER ASSISTANCE PROGRAMS

Federal financial assistance programs that have not been assigned a CFDA Number have been included in the accompanying "Schedule of Expenditures of Federal Awards." Programs for which the grantor agency is known are reported as other assistance and are identified as CFDA Number XX.000, where XX represents the federal grantor agency.

4. ASSISTANCE PROVIDED TO NON-STATE SUBRECIPIENTS

The Commonwealth of Virginia disbursed pass-through funds to non-state subrecipients from the following programs:

CFDA Number	Name of Federal Program	Amount
10.217	Higher Education Challenge Grants	\$ 10,156
10.450	Crop Insurance	52,323
10.500	Cooperative Extension Service	454,357
10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)	2,222,682
10.664	Cooperative Forestry Assistance	671,704
10.676	Forest Legacy Program	413,571
11.405	Anadromous Fish Conservation Act Program	7,918
11.417	Sea Grant Support	29,392
11.419	Coastal Zone Management Administration Awards	1,086,126
11.457	Chesapeake Bay Studies	10,000
11.473	Coastal Services Center	55,483
12.112	Payments to States in Lieu of Real Estate Taxes	81,119
12.300	Basic and Applied Scientific Research	213,509

14.511	Community Outreach Partnership Center Program	4,000
15.616	Clean Vessel Act	51,637
15.623	North American Wetlands Conservation Fund	157,463
15.904	Historic Preservation Fund Grants-In-Aid	76,349
16.523	Juvenile Accountability Incentive Block Grants	1,315,025
16.528	Training Grants to Stop Abuse and Sexual Assault of Older Individuals or Individuals with Disabilities	2,989
16.540	Juvenile Justice and Delinquency Prevention: Allocation to States	1,897,045
16.575	Crime Victim Assistance	8,218,696
16.579	Byrne Formula Grant Program	6,426,893
16.588	Violence Against Women Formula Grants	2,363,930
16.589	Enforcement Grant Program	178
16.590	Enforcement of Protection Orders	98,521
16.592	Local Law Enforcement Block Grants Program	110,320
16.611	Closed-Circuit Televising of Child Victims of Abuse	35,769
17.235	Senior Community Service Employment Program	1,423,135
17.253	Welfare-to-Work Grants to States and Localities	2,632,674
17.257	One-Stop Career Center Initiative	471,031
17.261	Employment and Training Administration Pilots, Demonstrations, and Research Projects	2,380,812
17.720	Employment Programs for People with Disabilities	286,442
20.000	Section 2003B Child Passenger Funds	54,783
20.000	VA/DC Pass Thru to WRAP	30,222
20.000	U.S. Department of Transportation - Other Assistance	21,920
20.312	High Speed Ground Transportation: Next Generation High Speed Rail Program	12,252
20.505	Federal Transit: Metropolitan Planning Grants	1,620,542
20.509	Formula Grants for Other Than Urbanized Areas	9,418,188
20.515	State Planning and Research	209,250
20.516	Job Access: Reverse Commute	905,373
20.607	Section 154 Open Container	1,469,666
20.608	Section 164 Transfer Funds/Alcohol	88,493
20.703	Interagency Hazardous Materials Public Sector Training and Planning Grants	69,272
39.000	US General Services Admin-Other Assistance	148,158
45.149	Promotion of the Humanities: Division of Preservation and Access	4,639
45.164	Promotion of the Humanities: Public Programs	78,000
47.041	Engineering Grants	26,895
47.049	Mathematical and Physical Sciences	29,112
47.075	Social, Behavioral, and Economic Sciences	6,628

47.076	Education and Human Resources	123,245
59.037	Small Business Development Center	677,567
66.001	Air Pollution Control Program Support	136,120
66.419	Water Pollution Control: State and Interstate Program Support	39,713
66.454	Water Quality Management Planning	203,010
66.460	Nonpoint Source Implementation Grants	724,327
66.461	Wetland Program Grants	42,621
66.466	Chesapeake Bay Program	297,009
66.468	Capitalization Grants for Drinking Water State Revolving Fund	18,139,562
66.500	Environmental Protection: Consolidated Research	7,442
66.605	Performance Partnership Grants	66,264
83.536	Flood Mitigation Assistance	83,675
83.544	Public Assistance Grants	1,733,053
83.548	Hazard Mitigation Grant	180,164
83.552	Emergency Management Performance Grants	310,011
83.557	Pre-Disaster Mitigation	63,785
83.562	State and Local All Hazards Emergency Operations Planning	84,255
84.000	Department of Energy - Other Assistance	12,398
84.002	Adult Education: State Grant Program	10,965,310
84.010	Title I Grants to Local Educational Agencies	169,485,017
